BOLID

About Us

The Bolid scientific-research company was founded in 1991. Its field of activity is to manufacture and supply the equipment for safety and security systems and building automation systems.

Bolid's mission is to improve the effectiveness of safety, security and automation systems for buildings and facilities.

Our purpose is to remain the best for our customers by producing innovative products for security market today and tomorrow.

Some History

- 1991** – Bolid established as a company
- 1991-1997** – Release of stand-alone devices for centralized security systems
- 1998** – Launch of innovative security products based on the RS-485 interface
- 1999** – Orion Integrated Security System was developed and certified as a new hardware and software system
- 2003** – Bolid got its quality management system certified by ISO 9001 standard
- 2004** – The company mastered a new production line: a satellite vehicle tracking system
- 2007** – Bolid became a leader in manufacturing of addressable automatic fire protection devices and systems
- 2008** – New production area started: process controllers for engineering and utility systems
- 2010** – The staff exceeded 500 people
- 2013** – The 3rd production line for surface mounting of electronic components started, along with convection and selective soldering section
- 2014** – Bolid was a winner of the Pride of Russia Competition
- 2016** – New production area started: a wireless fire detection and fire alarm system
- 2017** – The company started to produce video surveillance equipment
- 2018** – Fire safety monitoring system was developed
- 2019** – The company's products are installed on 1 million sites
- 2021** – The Bolid Company faced its 30th anniversary with large-scale production of more than 450 types of devices and dozens of software products
- 2022** – Construction of new production workshops and offices has started
- 2023** – The staff exceeded 900 people

Our Achievements

The Bolid Company is the leaders in the development of automatic fire protection and security systems. For last 25 years, popular Orion Integrated Security System has found its consumers at 1 000,000 sites and has become the most popular in Russia.

Sixty awards for innovative products were obtained in such prestigious international exhibitions as IFSEC, MIPS, Sfitex, KIPS, Safety Technologies, Bezpeka, HI-TECH BUILDING.

BOLID[®]

Our Capacity

We are proud of our team of specialists.

Over 100 engineers and programmers are employing now to develop new hardware and software providing high-quality design and implementation of innovative solutions.

For 30 years, a great experience has been acquired in building integrated security systems with multi-location structure.

In the coming years, we plan to make substantial progress in the fields of utility metering systems, centralized security, production process automation. We are also going to enter the overseas markets.

Products

Using our devices and systems you can build:

- *Fire protection systems: fire detection and fire alarm systems, voice announcement systems, automatic fire extinguishing and smoke removal systems*
- *Intrusion alarm systems and perimeter monitoring systems*
- *Access control and vehicle parking control systems*
- *CCTV systems*
- *Building automation systems*
- *Utility metering systems*

Our systems are easy to install, set, maintain, and monitor. They can be flexibly scaled to be adapted to consumer's requirements.

Systems and devices from a single manufacturer is a guarantee of compatibility, reliability, and single software.

Production

In the years of company's existence, more than 450 types of hardware and numerous software solutions were developed.

Our production lines are equipped with state-of-the-art assembling and inspecting equipment manufactured by such companies as FUJI, DEC, ERSA, NUTEC, ORBOTECH, ESPEC, SEICA, TERADYNE.

The automated production management system controls and monitors the quality of all the operations.

The quality management system is certified as per GOST ISO 9001-2011 standard.

Delivery

The manufactured products are delivered to EAEU countries and other foreign countries.

*The dealer network covers major cities in Russia and CIS countries
Equipment is delivered to any destination in Russia and abroad with
all required certificates.*

Support

Up to 6,000 professionals attend the company's workshops and webinars.

Seven authorized partners provide training courses on the Bolid's products.

For the convenience of customers, a network of regional service centers was developed.
